*Herba pusilla, muscosa, glabra, oppositifolia. Flores axillares, ebracteati, minuti.*

OBS. *Huic affinitate proxima est Hedyotis maritima Linn. suppl., diversa præcipue capsulâ evalvi.*

*M. muscosa.* (T.) v. v.

*Pæderota minima.* Koenig in Retz. obs. fasc. 5. p. 10. Willd. sp. pl. 1. p. 7.

## Sect. II. Stamina 4 antherifera.

### EUPHRASIA. L.

*Calyx* tubulosus, bifidus, laciniis lateralibus bifidis. *Corolla* ringens, labio superiore bifido; inferiore 3-partito. *Stamina* didyma. *Antheræ* didymæ, cohærentes, lobis basi mucronatis. *Stigma* bilabiatum. *Capsula* bilocularis, bivalvis, valvis medio septiferis, dissepimento tardiùs bipartibili. *Semina* striata.

*Herbæ oppositifoliæ.* *Folia* sœpiùs dentata, v. incisa. *Spica terminalis, foliata.* *Calyces ebracteati.* *Antheræ plerumque barbatæ.*

1. *E. alpina*, corollæ laciniis omnibus emarginatis, calycibus subsessilibus pubescentulis capsulâ parùm brevioribus, foliis cuneatis 3—5-crenatis glabris: ramorum fertilium distantibus; sterilium decussatis. (D.) v. v.

2. *E. tetragona*, corollæ laciniis inferioribus emarginatis, calycibus glabris obtusis subsessilibus capsules æquantibus, foliis subovalibus 3—5-dentatis obtusis glabris, caule tetragonum. (M.) v. v.

3. *E. collina*, corollæ laciniis omnibus emarginatis, calycibus glabris capsulâ ferè dimidio brevioribus, spicâ multiflorâ: paribus inferioribus distantibus, foliis linear-i-cuneatis obtusè tridentatis glabris. (D.) v. v.

4. *E. striata*, corollæ laciniis striatis retusis, calycibus acutiusculis glabris, spicâ subovatâ: floribus omnibus imbricatis, bracteis foliisque subpalmato-5-lobis glabris, caulis adscendentibus. (D.) v. v.

5. *E. paludosa*, corollæ laciniis subintegris, calycibus acutiusculis, spicæ multifloræ paribus inferioribus distinctis, foliis linearibus acutiusculis paucidentatis glabris: rameis distantibus. (J.) v. v.

6. *E. spe-*

6. *E. speciosa*, corollæ laciniis retusis : inferiorum intermediâ emarginatâ, calycibus acutiusculis pubescentibus, foliis decussatis ovatis crenato-incisis cauleque erecto scabris. (J.) v. v.
7. *E. scabra*, glanduloso-pubescentis scabra, corollæ pubescentis laciniis integris, calycibus acutis, foliis lanceolatis dentato-incisis. (D. M.) v. v.
8. *E. arguta*, pubescens, corollæ laciniis integris, calycibus bracteisque setaceo-acuminatis, foliis lanceolatis pinnatifido-incisis scabris, caule erecto. (J.) v. v.

## BUCHNERA.

Buchneræ species. L.

*Calyx* tubulosus, 10-striatus, 5-dentatus, æqualis. *Corella* 6-hypocrateriformis, limbo 5-partito, subæquali; v. bilabiata. *Stamina* didynama, inclusa. *Antheræ* lineares, integræ. *Stigma* subclavatum, emarginatum. *Capsula* bilocularis, bivalvis, valvis medio septiferis. *Placenta* columnaris, demum libera.

Herbæ oppositifoliæ, sœpè scabré, siccatione nigricantes. Spica terminalis. Flores tribracteati, albi v. purpurei, cito nigricantes.

Obs. Hujus loci sunt Buchnera americana, elongata, asiatica, et Peripea palustris Aubl. quæ a B. elongatâ ut videtur diversa.

## I. Corollæ limbus 5-partitus, subæqualis.

1. *B. urticifolia*, scabra, foliis infimis approximatis oblongis obtusis : mediisque dentatis lanceolatis distantibus, bracteis lanceolatis ciliatis calycis dimidio brevioribus, capsulæ apice exerto. (T.) v. v.
2. *B. tetragona*, glabra, caule tetragonō, foliis paucidentatis : infimis oblongis ; mediis lanceolatis, spicis 4-gonis, bracteis latè ovatis ciliatis calyce longioribus. (T.) B. v. s.
3. *B. gracilis*, glabriuscula, foliis oblongis obtusis integris, caule simplici glabro, spicâ rarâ, bracteis ciliatis calycis dimidio brevioribus, capsulæ apice exerto. (J.) v. v.
4. *B. linearis*, scabra, foliis oblongo-linearibus integris obtusis, spicâ fructiferâ rarâ, bracteis linearibus longitudine dimidi calycis pilosi. (T.) v. v.
5. *B. tenella*, scabra, foliis lineari-lanceolatis integris acutis, spicâ rarâ, bracteis lanceolatis calycis dimidium æquantiibus, tubo corollæ glabriusculo. (T.) v. v.

6. B. ra-
